

# Getting started

Accengage SDK allows you to track the execution and display of In-App and to handle Push notifications of your application.

This Xamarin documentation explains the various methods available and how to use them.

In order to understand more deeply the features of the SDK, please refer also to the native [iOS](#) and [Android](#) documentations.

Plugin Version 1.3.0:

- Android SDK version 3.8.4
- iOS SDK version 6.4.0
