

# Push Notifications 1.1.x

## Enable Pushes Notifications

### iOS

To enable pushes notifications for iOS, edit your **config/BMA4SCordovaConfig.json** file with the following line:

```
"ios_allowPushNotification":true, // Use iOS push notifications feature
```

Please see [iOS Documentation](#) for more informations.

### Android

Add your own sender Id to the **config/BMA4SCordovaConfig.json** file:

```
"android_senderId":"gcm:your-sender-id", // GCM sender id. Example : 123456
```

Please see [Android Documentation](#) for more informations.

## Prevent RichPush notifications display

You can prevent the display of any RichPush notification, by calling:

```
BMA4S.setPushNotificationLocked(true)
```

To reenale the RichPush Notifications, you can call:

```
BMA4S.setPushNotificationLocked(false)
```

You can enable/disable RichPush notifications at any time.

If you need to know the Rich Push lock status:

```
BMA4S.isPushNotificationLocked(callback)
```

This lock does not affect In-App notifications.
